

Hello, I am Rafael León, a Systems Engineer with 6 years of experience as a backend developer.

With six years of experience as a backend developer, I have honed my skills in building robust and scalable solutions across various platforms, including Windows services, desktop applications, APIs, and MVC web applications.

I hold a degree in Systems Engineering and have specialized in .NET C#, where I have been deeply involved in all stages of the software development lifecycle. My experience spans from gathering requirements and conducting analysis to coding, testing, deploying, and providing post-production support.

In my previous roles, I have worked in the financial sector at CECOBAN (PAC - Authorized Certification Provider) and in the banking industry at CITIBANAMEX. At CECOBAN, I was part of the team that successfully navigated the regulatory upgrade from CFDI version 3.3 to 4.0, as well as the implementation of the Carta Porte 2.0 addendum. These projects were critical in generating compliant invoices for various banks.

At CITIBANAMEX, I contributed to the bank's separation process by migrating components to new infrastructure, making necessary adjustments, and conducting thorough testing and deployments to ensure seamless operation across different environments.

In addition to my hands-on experience, I have also gained knowledge in cloud services with Microsoft Azure, version control systems such as Bitbucket, TVFC, and Git, as well as applying SOLID principles and design patterns in my daily work. These skills have enabled me to develop maintainable, efficient, and secure software solutions.

I am excited about the opportunity to bring my expertise to this company and contribute to your team's success. I am confident that my background in backend development, coupled with my experience in the financial sector, aligns well with the requirements of this role.

Thank you for considering my application. I look forward to the possibility of discussing how my skills and experiences can contribute to the continued success of your company.

Sincerely,

Rafael León
